Detailed Action

Applicant cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Status of the Application

This application is a continuation of U.S. Patent Application Serial No.

09/342,422, filed on June 29, 1999 and now USPAT NO. 6,259,831.

Claims 40-54 and 56-77 are pending in this application as applicant filed an amendment dated April 16, 2003.

Claims 1-39 have been cancelled prior to first office action.

Claim 55 has been cancelled by amendment dated on 4-16-2003.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Obviousness-type Double Patenting Rejection

Claims 40 – 54 and 56-77 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-39 of U.S. Patent No. 6,259,831. Although the conflicting claims are not identical, they are not patentably distinct from each other because the gist of the invention is clearly disclosed in USPAT6, 259,831. Although the claims are identical the instant application fails to distinguish from USPATNO.6, 259,831 such as for example, claims 40-44 of the application recites same claim language as in claims 36-38 of USPATNO. 6,259,831, claims 59-63 of the application recites similar claim language as in the claims 8 and 16-20 of USPATNO.6, 259,831. Thus, it would be obvious to one of ordinary skill in the art at the time of the invention was made to re-arranged the claims language in different form to claim various limitation.

35 USC 103 Rejection

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2874

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 40-54 and 56-77 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jin et al. (USPATNO. 6,256,430) or Young et al (USPATNO. 6,091,867).

Figure 7 of Jin et al disclose the instant invention as shown below.

FIG. 7

Figure 10 of Young et al also shows the instant invention as shown below

FIG. 10

Thus, the above-mentioned claims are clearly anticipated by the above-mentioned references.

Both references disclose all the claimed structures except for a solid state switching elements as amended. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the solid state switching elements in any one of the above mentioned references since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, USPQ 416.

Art Unit: 2874

Applicant's arguments with respect to claims 40 -54 and 56-77 have been considered but are moot in view of the new ground(s) of rejection.

Please note that applicant have not filed a terminal disclaimer yet.

Next office action will be made final.
